Peptide content	[method]	[specification]	[result]
Water content	[method]	[specification]	[result]
Endotoxin	[method]	[specification]	[result]
Residual solvents	[method]	[specification]	[result]

How to use this template

- Replace this file with the genuine, signed certificate issued by your testing laboratory for each batch.
- Never publish fabricated or estimated results. Every value must come from the laboratory's report.
- Name each file after its document reference and update the links in assets/js/products.js.
